Atrium Health Levine Children's School-Based Virtual Care for faculty and staff

Keeping yourself healthy is a top priority. But when you don't feel well at work, it's not always easy to interrupt the day for a doctor's visit. With Atrium Health Levine Children's School-Based Virtual Care, you can get virtual medical care from a primary care provider for minor conditions – without leaving work.

Common illnesses treated

- Allergies
- Asthma
- Coughs and colds
- Ear pain
- Fever
- Flu symptoms
- Head lice
- Headache
- Pink eye
- Rash
- Sore throat
- Stomachache
- Urinary tract infection

Who can use School-Based Virtual Care?

All faculty and staff at your school can use virtual care to be seen by an Atrium Health primary care provider. You can get care for conditions that occur during the day or request a visit in advance for minor, non-contagious conditions.

How does it work?

Over a video visit, a health care provider examines you with special technology, gives a diagnosis and can even send in prescriptions. If your condition isn't contagious, you can get back to your day with little interruption. For your convenience, we'll send notes about your visit to your primary care doctor.

How much does it cost?

Many insurance plans cover virtual care, and financial assistance may be available if you don't have insurance.

What is the benefit of School-Based Virtual Care?

This virtual option gives school staff access to convenient, high-quality care within your daily routine, without taking time away from work.

Ready to start a visit?

Please contact your school nurse.
