

## New Middle School #3

### New School Project

The 2023 general obligation bond referendum presents us with a unique opportunity to enhance the learning environment and educational opportunities for our students. It aims to offer more academic options, alleviate overcrowding, and support safe schools. Here are the highlights of the project that will impact our school communities:

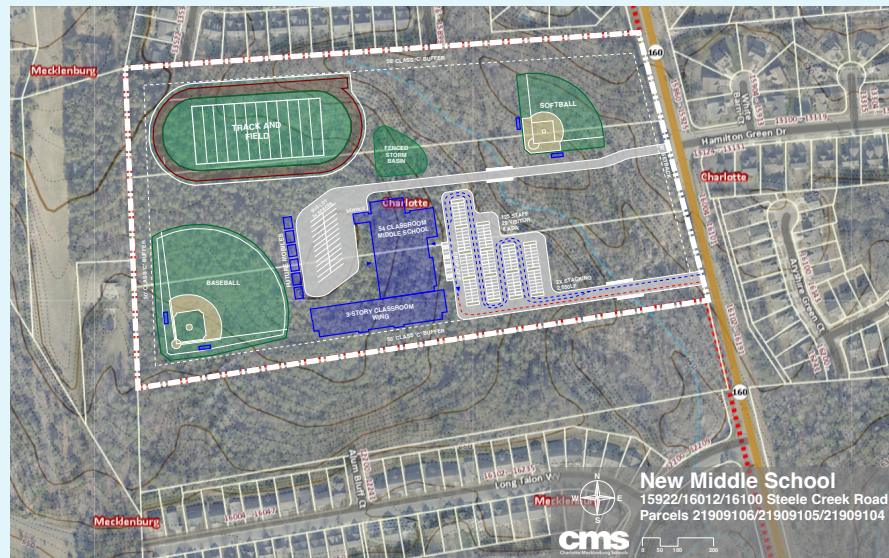

### School Board Member District 6

The New Middle School #3 bond project involves the construction of a modern 54-classroom baseline facility located on HWY 160. This initiative is designed to alleviate overcrowding at Southwest and Kennedy Middle Schools, with the potential to also assist Quail Hollow Middle School. By providing additional classroom space and upgraded facilities, the project aims to enhance the learning environment for students in the area. The new middle school will offer a comprehensive and contemporary setting that supports academic growth and fosters a positive educational experience.

### Estimated Cost: \$98,436,153

### Questions for CMS?
