Greetings ARES Families:

This year, Charlotte-Mecklenburg Schools will be using the Mastery View Predictive Assessments as a benchmark tool to help our district customize instruction on a timely basis for your student. We will use these assessments in the following areas:

- 3rd -8th grade Math
- 3rd - 8th literacy
- 5th and 8th Science
- Biology
- English II
- Math 1
- Math 3

These assessments will be given 2-3 times a year/semester. The first two assessments will cover only content covered in the past quarter. The final assessments will reflect all of the standards for the grade level or course. These assessments are intended to inform future instruction and are not used for grades. Your student has taken this assessment in one or more of the areas above. The attached report shares how your student performed on this assessment, including their overall achievement data. We encourage you to discuss these results with your student's teacher. There are additional resources to use outside of the school day located at <https://bit.ly/beyondschoolday>.

To learn more about this assessment, please visit: <https://bit.ly/46VOJY1>

Yours In Service:

Principal Palmer
