LI/TD AT SGE

Culture: We value the diversity within our LI/TD school and believe that building a community is an important part of the LI/TD experience.

Learner Attributes: At SGE, we aim to educate and nurture students who are reflective, resilient, unconventional thinkers and decision-makers who embrace diversity and demonstrate respect for all.

Curriculum & Instruction: As a LI/TD school, we implement the core district curriculum with advanced supplements to nurture potential and meet the advanced learning needs of students. Enrichment electives are provided to engage students in a variety of choice-based and high-interest learning experiences. We know that nurturing potential and meeting advanced learning needs are critical to individual success.

Parents & Community Engagement: Shamrock Gardens works to foster community partnerships to provide students with enrichment opportunities as well as host events to positively support students and their families through the ins and outs of the LI/TD theme. LI/TD teachers engage in specialized professional development at the school and district level and/or through AIG licensure programs. Shamrock Gardens has a thriving and active PTA.

The 4 E's

We recognize learning happens in many different ways. Our scholars are encouraged to be curious, ask “why”, and learn through exploration. Students explore through our learning gardens and many engineering-based activities. They are able to work cooperatively, ask questions, research, invent, and experience learning in a joyful environment every day!

Our scholars are empowered each day to think, be, and do *different*. Students are empowered to set goals and to take ownership of their choices and their education. From student-led conferences to Dragon Discussions, SGE scholars are empowered to be their best selves!

From butterfly gardens to school-wide clubs, we invest in growing the whole child beyond academic learning. We enrich students by going above and beyond what the state standards require.

Scholars work together to solve problems, analyze, and apply their learning throughout the day. The students are engaged in hands-on activities to help them learn about their world.

OUR VISION

SGE will provide a family oriented, community-based, intimate learning environment that promotes the social, emotional, & academic needs personal to each child.

OUR MISSION

Talented Scholars + Dedicated Staff + Engaged Families = Our Dynamic & Diverse Community
